DETAILED ACTION

Claims 1-7 are pending in the instant application.

Priority

This application claims benefit of 60/506,229 on 09/26/2003.

Reasons for Allowance

Claims 1-7 are allowable over prior art of record.

The present invention is directed to compounds of the following formula,

, or a tautomer, enantiomer or stereoisomer thereof, or a physiologically acceptable salt or solvate therefor or mixtures thereof. The closest prior art of record is Reutrakul et al. (U.S. Pat. Num. 6,403,636), which teaches a xanthone derivative that has a furan group as part of the tetracyclic system. The difference is that in the instant application, there is a pyrrolyl group, instead of a furan group. The prior art of Reutrakul does not teach a pyrrolyl group as part of the tetracyclic system. Therefore, the claims are allowable.
